ABOUT ME

- B.Tech student at IIT Ropar with strong problem-solving skills and a passion for web and Android app development.
- Experienced in React, Flutter, Java, and Python, with a keen ability to tackle challenges efficiently.
- Skilled in time management and adaptive learning to stay updated with the latest technologies.
- Developed multiple projects, including a Bookstore app, Bank Management System, and Tic Tac Toe game.

PROJECTS

- **BookStoreApp (Full Stack Project)** Dec 2024 - Jan 2025
React, Nodejs, HTML, Javascript, CSS **Github**
 - All-in-One Bookstore Management: Offers a seamless experience with user authentication, intuitive book management, and advanced search capabilities, ensuring effortless navigation and organization.
 - Built with a React frontend, a powerful Node.js and Express backend, and a scalable MongoDB database, delivering smooth client-server interaction through optimized RESTful APIs.
- **Bank-management-system** Oct 2024 - Nov 2024
Java, PostgreSQL **Github**
 - Effortless Banking Operations: A feature-rich banking system enabling secure account creation, deposits, withdrawals, balance inquiries, and transaction tracking, all safeguarded with PIN-based authentication.
 - Robust MySQL Integration: Utilizes MySQL for efficient data management, ensuring seamless storage and retrieval of user accounts, transactions, and banking activities for a smooth and reliable experience.
- **Twitter-scraping-selenium** Sep 2024 - Oct 2024
HTML, Python, Selenium **Github**
 - Intelligent Trend Extraction: Leveraged Selenium to automate login and navigation on X (formerly Twitter), efficiently capturing trending hashtags from the "Explore" tab for real-time trend analysis.
 - Robust Data Management: Implemented MongoDB to securely store extracted trends along with metadata such as timestamps and IP addresses, ensuring seamless tracking and insightful historical analysis of social media trends.
